
Thirty most abundant CARD gene families by city and season (DS02)
resistance-nodulation-cell division (RND) antibiotic efflux pump [Multi-class]
major facilitator superfamily (MFS) antibiotic efflux pump [Tetracycline]
sulfonamide resistant sul [Folate pathway antagonist]
ANT(3") [Aminoglycoside]
msr-type ABC-F protein [MLS]
tetracycline-resistant ribosomal protection protein [Tetracycline]
macrolide phosphotransferase (MPH) [MLS]
VEB beta-lactamase [Beta-lactam]
ANT(6) [Aminoglycoside]
macrolide esterase [MLS]
AAC(6') [Aminoglycoside]
Erm 23S ribosomal RNA methyltransferase [MLS]
rifamycin-resistant beta-subunit of RNA polymerase (rpoB) [Rifamycin]
OXA beta-lactamase [Beta-lactam]
chloramphenicol acetyltransferase (CAT) [Phenicol]
RSD2 beta-lactamase [Beta-lactam]
APH(6) [Aminoglycoside]
APH(3") [Aminoglycoside]
lincosamide nucleotidyltransferase (LNU) [MLS]
Miscellaneous ABC-F subfamily ATP-binding cassette ribosomal protection proteins [MLS]
small multidrug resistance (SMR) antibiotic efflux pump [Biocide]
trimethoprim resistant dihydrofolate reductase dfr [Folate pathway antagonist]
OXA beta-lactamase; OXA-10-like beta-lactamase [Beta-lactam]
CfxA beta-lactamase [Beta-lactam]
pmr phosphoethanolamine transferase [Peptide/polymyxin]
ATP-binding cassette (ABC) antibiotic efflux pump [MLS]
rifampin ADP-ribosyltransferase (Arr) [Rifamycin]
OXA beta-lactamase; OXA-46-like beta-lactamase [Beta-lactam]
GES beta-lactamase [Beta-lactam]
tetracycline inactivation enzyme [Tetracycline]
